

Pink and White Gel Application

1. Clean hand with LeChat Gel Cleanser nail Preparation Solution.

2. Gently push back cuticles & remove pterygium

3. Remove shine on natural nail bed with LeChat 100/180 grit zebra file.

4. Apply Deco™ Natural tip extensions. Cut and shape according to your client's desire. Make sure to blend tips down even to nail bed. Pay close attention to seam line. Brush off excess dust.

5. Apply LeChat Gel Primer (optional) on natural nail plate only. Allow primer to dry completely to chalky white. Do not apply primer on tip extensions

6. Apply 1 coat of Baby Pink with LeChat Gel Brush onto the nails on one hand as if you were applying nail polish. Cure under the UV light for 30 seconds.

7. Remove hand from UV light. Spray and wipe off sticky residue with Gel Cleanser

8. Using LeChat Gel Brush, apply white gel onto tip. (Note: Press brush hard for lighter white. Press brush soft for whiter white.) Allow 3 to 5 seconds for the gel to self-level and even out.

9. Use a clean and dry Gel Brush to clean for a crisp smile line. Cure under UV light for 30 seconds. It is necessary to clean brush with LeChat Gel Brush Cleaner. (Suggestions: Draw one finger at a time. Moving from hand to hand while curing and repeating for all fingers.)

10. Apply one layer of Gel Base approximately 1mm from cuticle down to free edge. Be sure to cover completely around the white area and cap off the free edge. Sprinkle Powder Gel® over entire nail while turning clients finger from side to side to ensure complete coverage. Cure under UV light for 15 seconds. At this time, build to make the nail thicker or create more curve using more Gel Base and powder if necessary. Cure for 2 minutes.

11. Remove from UV lamp, file and shape. Make sure cuticle area is cleaned and tapered. Buff thoroughly for smooth surface. Brush off excess dust with nylon brush.

12. Spray & wipe all nails with Gel Cleanser nail Preparation Solution.

13. Apply first thin layer of Gel top. Make sure to brush up & down to thin out gel. Cover all around nail. Cure for 15 secs. (Do not use excess amount. Nails will come out thick.)

14. Apply second layer of Gel Top directly on nails. (Less gel should be used on this layer. When remove the brush out of the bottle, make sure to empty most of the gel on both sides of the brush. Leaving small amount. This will ensure there is no thickness leaving nails smooth with a shiny finish. Cure for 2 minutes.

15. Remove from light then spray and wipe nails with Gel Cleanser nail Preparation Solution.
